

GSM ALARM SYSTEM

MOBILE SECURITY READY FOR ACTION IN NO TIME!

With the **GSM Alarm System** you will purchase a **cost-effective** and safe **security system** perfectly suitable for your apartment, summer residence, mobile home, etc. ... – to secure your entire contents, furniture and all items, which you want to keep an eye on while away.

The GSM Alarm System is an **alarm device** with an **integrated motion detector** and an **auto dialer** for commercial **Siemens mobile phones** using any SIM card. It is all perfectly disguised as a video cassette case, **runs autonomously** and is applicable **pan-European!**

YOU CAN EASILY SECURE AND CONTROL YOUR:

HOMESTEAD, APARTMENT,
HOLIDAY FLAT AND SUMMER RESIDENCE.

OFFICE, SHOP,
INN, STOREHOUSE, ETC.

MOBILE HOME OR POWER CRUISER,
VETERAN OR VINTAGE CAR, GARAGE, YACHT.

Turn on – Put up - Control

Due to its **small size** and its **camouflage** as **video cassette or book** the system is almost everywhere applicable. The GSM Alarm System is **ready for action within seconds** by **automatic set-up**.

Runs autonomously

Even **without power** supply the system monitors your Objects approximately two days. In addition to that the complete alarm system including the cell phone can be supplied on the **long run** by the **220V mobile phone charger**.

Adjustable alerting

Get **alerted** simply **by a call** on your home or mobile phone. In an alarm case you can **"listen into"** your monitored **object** per sensitive microphone which is a part of the device. Alternatively you can **receive** your alarm signal **per SMS**.

Applicable pan-European

You got a summer residence in Italy? A yacht by Ibiza? No problem - due to the roaming function.

Functionality

The integrated **motion detector** **grasps** every movement in the room.

After the **entrance delay time**, your **defined phone number** will be called or is receiving an SMS.

You **receive the call (or SMS)** and can listen directly „into" the monitored object.
